# ***DECORATIVE GROUND LIGHT***

**LED Inground Light & LED Underground Light**

- ◎ SUS316# front cover + 12# die-casting housing + tempered glass
- ◎ 8°/15°/25°/30°/45°/60°/90° or asymmetrical lens optional
- ◎ 1-36W power range
- ◎ DC12/24V, AC100-240V input voltage optional
- ◎ Waterproof IP67

# *DECORATIVE WALL LIGHT*

**Recessed LED Wall Light & Stair Light**

- ✓ 12# Die-casting aluminum housing + tempered glass
- ✓ SMD, COB or high power LED
- ✓ DC12/24V, AC100-240V input voltage optional
- ✓ 1-8W power range
- ✓ Waterproof IP65

# ***DECORATIVE GARDEN LIGHT***

**LED Landscape Light & LED Garden Spot Light**

- 8°/15°/25°/30°/45°/60° beam angle optional
- CREE/BRIDGELUX/OSRAM/EPISTAR LED
- PWM/0-10V/DALI/TRIAC dimmable
- Base mounting, U style bracket installation or with spike
- Waterproof IP65

The image features a composite of several photographs. On the left, a wide-angle shot shows a garden at night with various plants and trees illuminated by ground-level spotlights. In the center-left, a black rectangular box contains the product's name and a bulleted list of features. To the right of this box is a close-up of four different outdoor spotlights: one mounted on a spike, one on a base with a U-shaped bracket, one on a stand, and one mounted on a wall. The background of the entire composite is a blurred night scene of a house with lights on.

## **LED High Bay Light & LED Street Light & LED Flood Light & LED Area Light**

- 50W-1000W LED industry lights
- Experienced R&D, production and sales team
- One-stop integrated lighting solution
- High quality CREE/PHILIPS LED
- 5 years warranty

# LED Smart Controller

DECODER  
1-32 CHANNEL DMX512  
LT-905/995/912/924/932-OLED

XLR3 XLR5 RJ45 RDM  
Photoelectric Isolation Display Short Circuit Protection Overload Protection

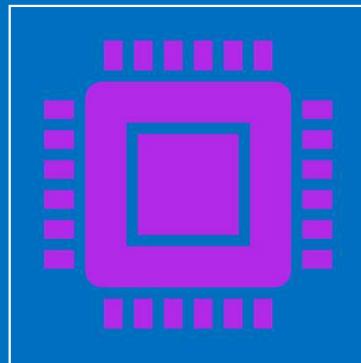

Dimming Curve graph showing Output Brightness vs DMX value (0-255) for various gamma values (0.4, 0.5, 0.6, 0.8, 1.0, 1.5, 2.0, 2.5, 3.5, 6.5, ...)

- App remote for changing address
- OLED Display screen
- 8 bit/16 bit
- 4 DMX interfaces
- Photoelectric isolation technology
- Short Circuit / Overload protection
- Dimming Curve: 0.1~9.9

WiFi-RDM interface shown with a smartphone displaying the app.

RDM ↔ DMX connection diagram.

Physical product image of the LT-905/995/912/924/932-OLED decoder unit.

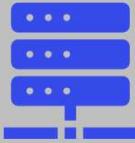

DMX512 Master controller is the output signal of international standard DMX512/1990. It not only can control all the LED lights that receiving the standard DMX signal in the market, but also can work with our DMX decoder to control the general LED lights without DMX512.

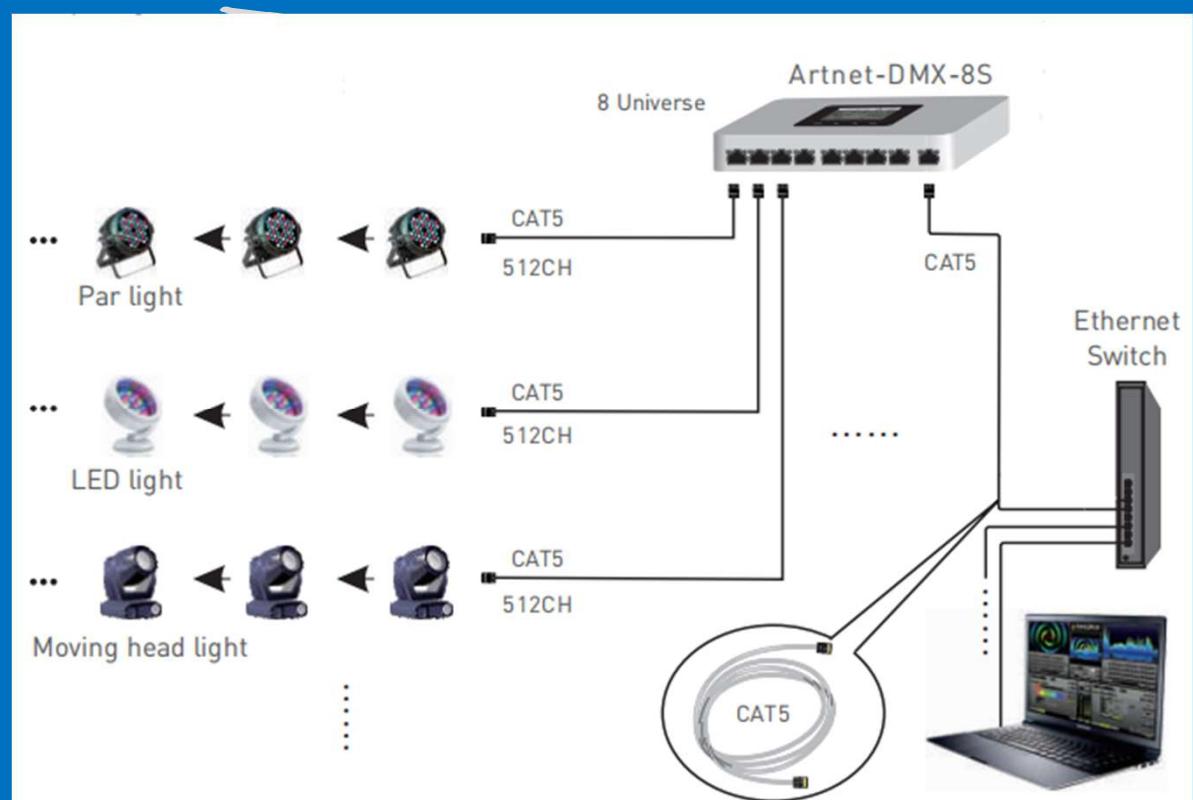

DMX Decoder adopted the advanced micro-electronic control technology to convert universal DMX512/1990 digital signal to CC/CV PWM signal to drive LED, which controlled by DMX512 console, realize 0-100% brightness or various changing effect. And can control single color, dupi-color, RGB, RGBY, RGBW, RGBA LED light

# *8 universe Artnet-DMX Controller; support SD card*

**Artnet-DMX Control products.**  
Based on the Artnet protocol, it  
is able to quick convert Artnet  
network data packet into  
DMX512 data.

There are **8 universes** available, and it provides RJ45 interface. **SD card** is supported in order to update firmware and data saving. Commonly compatible with all the Artnet software in the market, like **MADRIX**.

# **DALI Mechanism**

- DALI is the young generation lighting control protocol in the realm of lighting control at present, Which adopt Manchester encoding transmission.
- With overall, grouping dimming, addressing dimming, various scene mode set, brightness traced, etc. powerful dimming function.
- Modern top grade hotel, shopping mall, household increasingly request high standard to lighting system.
- DALI protocol bus-mastering with simple, reliable, superior function etc. features, are used widely, showing the powerful advantage in the realm of intelligent lighting control.

# LED INTELLIGENT LIGHTING CONTROL

**DALI LED Driver**  
Digital Dimmable

0.1% Depth Dimming    T-PWM Digital Dimming

- T-PWM dimming technology maintains CRI(color rendering index)unchangeable
- 0.1%-100% flicker-free wide dimming range
- Support PUSH DIM dimming
- Wide range voltage + Optional arbitrary current

## DALI-50-500-1750-F1P2

### LED Intelligent Driver

- Dimming interface: DALI, 1-10V [0~10V,10V PWM,resistor], Push Dim.
- PWM digital dimming, no alter LED color rendering index.
- Dimming range: 0~100%, LED start at 0.1% possible.
- Power factor > 0.99, Efficiency > 85%.
- Multiple current, wide voltage, compatible with a variety of LED lights.
- Short circuit / Over-heat / Over load / Non-load protection.
- Non-load output voltage 0V to prevent damages to LED caused by poor contact.
- Class 2 power supply. Full protective plastic housing.
- DALI bus standard: IEC62386-101, 102, 207.
- Compliant with Safety Extra Low Voltage standard.
- Suitable for indoor environments.

### Main Characteristics

Dimming Interface:	DALI, 1-10V [0~10V,10V PWM,resistor], Push Dim								Output Power Range:	5W~50W		
Dimming Range:	0~100%, LED start at 0.1% possible.								Current Accuracy:	±3%		
Input Voltage Range:	0-240Vac, ±10%								Max Output Voltage:	58Vdc		
Input Current:	115Vac ≤ 0.6A, 230Vac ≤ 0.3A								Non-load Output Voltage:	0Vdc		
Power Factor:	PF>0.99/115Vac, PF>0.95/230Vac, at full load								Working Temperature:	tc: 80°C ta: -30°C ~ 55°C		
Frequency:	50/60Hz								Working Humidity:	20 ~ 95%RH, non-condensing		
Efficiency:	>85%								Storage Temp., Humidity:	-40 ~ 80°C, 10~95%RH		
Inrush Currenttyp.p.:	Cold start 50A at 230Vac								Temp. Coefficient:	±0.03%/°C(0~50°C)		
Control Surge Capability:	L-N: 1kV								Vibration:	10~500Hz, 2G 12min./1cycle, period for 72min. each along X, Y, Z axes		
Leakage Current:	<0.5mA/230Vac											
THD:	<10% at 115Vac, <20% at 230Vac [full load]											
Output Current:	500mA	700mA	900mA	1050mA	1200mA	1450mA	1600mA	1750mA				
Output Voltage:	10-54V	10-54V	10-54V	10-48V	10-42V	10-34V	10-32V	10-29V				
Output Power:	5-27W	7-37.8W	9-48.6W	10.5-50.4W	12-50.4W	14.5-49.3W	16-51.2W	17.5-50.8W				

### DALI DRIVER

5W~50W 500~1750mA 10~54Vdc

# SMART HOMES

*Gateway with integrated infrared and RF Signals, remote real-time control via LAN, WiFi, 3G/4G mobile phone network*

## ***Features of Intelligent Solar / Courtyard Lights***

- Integrated Aluminium Frame super breakage resistant and harsh environment resistant.
- Solar Panel Self Clean System.
- One-Click Control by clicking the APP and controlling the status of lighting
- 10+ days lighting even in rainy day .Remote control with 3 lighting modes .
- Spilt Solar Street Light design for high altitude (40W-150W)
- 360Deg Lighting decoration.
- Bright Solar Plaza light for cold and hot area.
- 2 PIR motion Sensors for more sensitive detection.
- Multi-Directional Adjustable

# **FAS(Faulty Alarm System) Technology:**

When the light gets a fault, the client shall cooperate to check which module caused the fault, the checking work could easily cause divergence and misjudgment. It may cost a long analysis time, and the even worse customer refuses to cooperate.

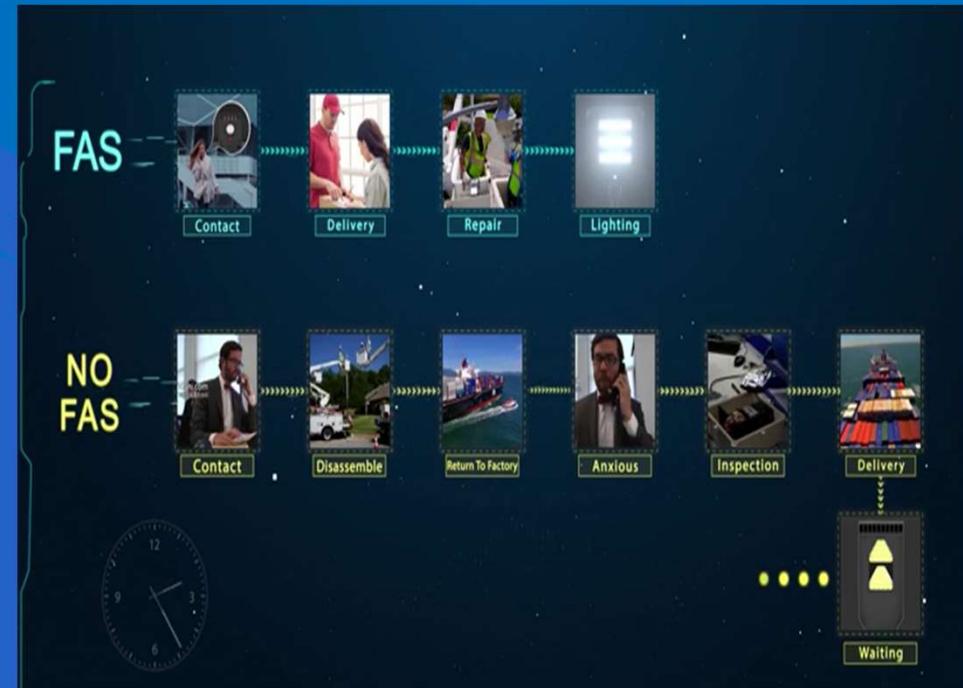

In order to solve this problem, We developed the FAS technology.

## **Function description:**

Reporting error of solar panel, lamp panel, control panel and battery pack by four indicators ;

## **Influence:**

- Shorten after-sales analysis time, improve after-sales accuracy.
- Improve customer user experience, shorten the overall after-sales time, offer customers more professional service.
- Customer complaint rate decreased, customer satisfaction increase.

# *ALS(Adaptive Lighting System) Technology*

Insufficient Lighting time and Brightness in case of failure was resolved by ALS technology :

## Function Description

It calculates the remaining power and automatically controlling the discharge current in accordance with the weather conditions the lamp can keep lighting for more than 10 days even on cloudy or rainy days.

## Influence

- The lighting time is prolonged by 258%
- Stronger guarantee for whole night's lighting.
- Customer complaint rate is almost zero;

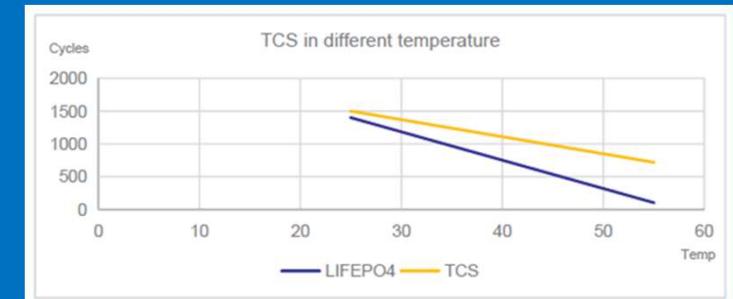

# **TCS (Temperature Control System)Technology**

## **Function description:**

The lamp can work at -20°C to 65°C environment even though all the Li-ion only can work 0°C -45°C, as our product has a temperature control system and special heat insulation protection, It can cut off the protection of the charging system to protect the lamp on low-temp and can maintain the temperature at a constant temperature without being affected on high-temp.

## **Influence:**

- Increase your sales area.
- Reduce your customer complaints.
- Lower your after-sales cost.

## **Features :**

- If we don't record the video then it will catch the pictures 20 times per day and Cameras can work more than 7 days after fully charged.
- If turn on the lights and record the video then Solar Cameras can work about 4.5 hours after fully charged.
- If turn off the lights and record the video then Solar Cameras can work about 11 hours after fully charged.
